## September 2017

" 82% of firms in Connacht/Ulster, 72% in Munster, 70% in the Rest of Leinster and 62% in Dublin expect Brexit to have a negative impact on their region over the next 12 months."

Dr Loretta O'Sullivan,  
Group Chief Economist, Bank of Ireland

The Bank of Ireland Regional Pulses bring together the views of consumers and businesses around the country. The 3 month moving averages show that sentiment was down in Dublin, the Rest of Leinster and Connacht/Ulster in September 2017, but up in Munster.

Households were generally less positive about the economy and their own finances this month, while firms downgraded their assessment of the current jobs situation and, in all bar Munster, pared back their near-term expectations for business activity. Brexit remains a headwind for firms across the regions, with the September results indicating that most expect it to have a negative impact on local economies.

### KEY POINTS

- Three out of four Regional Pulses down in September
- Munster bucks the trend
- House price and rent expectations in positive territory

### REGIONAL PULSES

Three Month Moving Averages

Rest of Leinster refers to Leinster excluding Dublin. Ulster only refers to Cavan, Donegal and Monaghan.

# Background

## THE ECONOMIC PULSE

Bank of Ireland's new economic indicator for Ireland – the Economic Pulse – is based on a series of surveys. Each month households and firms are asked for their views on a wide range of topics including the economy, their financial situation, spending plans, house price expectations, business activity and hiring intentions. Key business sectors such as industry, services, retail and construction are covered, as well as regions. The information gathered is combined into high level indices, with responses to individual questions also provided along with analysis and insights.

## GATHERING THE DATA

Ipsos MRBI are undertaking the fieldwork for the surveys on behalf of Bank of Ireland. A best practice approach to data collection and methodology has been adopted within a harmonised EU framework.

1000 households, 500 firms in industry, 800 services firms, 500 retailers and 250 construction firms participate in the surveys each month.

## USING THE INFORMATION

Business and consumer surveys provide essential information for economic surveillance, short-term forecasting and research.

They are also useful for policymakers, as well as helping firms with business planning.

Survey data are a key complement to official statistics, with high frequency and timeliness among their main qualities.

## THE EU DIMENSION

Bank of Ireland is partnering with the European Commission on the surveys. The data collected will feed into the Joint Harmonised EU Programme of Business and Consumer Surveys. This is a Europe-wide sentiment study which has been running since the 1960s. The data generated within this framework are particularly useful for monitoring economic developments at EU and Euro area level and also allow the situation in Ireland to be compared with that of other Member States.
