 Regional
Pulse

Regional Pulse

March 2022

“The uncertain geopolitical situation is a headwind for regional growth and living costs countrywide.”

Dr Loretta O’Sullivan,
Group Chief Economist, Bank of Ireland

The Bank of Ireland Regional Pulses bring together the views of households and firms around the country. The indices are calculated on a 3 month moving average basis and show that sentiment was up in Dublin and Munster, broadly unchanged in the Rest of Leinster and down in Connacht/Ulster in the January to March period compared with the December to February period.

The standalone monthly data point to a more widespread hit to confidence in March though. Amid the escalation of the Russian-Ukraine conflict, firms in all regions downgraded their expectations for business activity, while households in all regions were gloomier about the outlook for the economy and their own finances.

KEY POINTS

- Latest Regional Pulses mixed
- 3-month moving average basis
- Softness evident in the March data

REGIONAL PULSES

Three Month Moving Averages

Rest of Leinster refers to Leinster excluding Dublin. Ulster only refers to Cavan, Donegal and Monaghan.

Background

THE ECONOMIC PULSE

Bank of Ireland's new economic indicator for Ireland – the Economic Pulse – is based on a series of surveys. Each month households and firms are asked for their views on a wide range of topics including the economy, their financial situation, spending plans, house price expectations, business activity and hiring intentions. Key business sectors such as industry, services, retail and construction are covered, as well as regions. The information gathered is combined into high level indices, with responses to individual questions also provided along with analysis and insights.

GATHERING THE DATA

Ipsos MRBI are undertaking the fieldwork for the surveys on behalf of Bank of Ireland. A best practice approach to data collection and methodology has been adopted within a harmonised EU framework.

1000 households, 300 firms in industry, 500 services firms, 350 retailers and 200 construction firms participate in the surveys each month.

USING THE INFORMATION

Business and consumer surveys provide essential information for economic surveillance, short-term forecasting and research.

They are also useful for policymakers, as well as helping firms with business planning.

Survey data are a key complement to official statistics, with high frequency and timeliness among their main qualities.

THE EU DIMENSION

Bank of Ireland is partnering with the European Commission on the surveys. The data collected feed into the Joint Harmonised EU Programme of Business and Consumer Surveys. This is a Europe-wide sentiment study which has been running since the 1960s. The data generated within this framework are particularly useful for monitoring economic developments at EU and Euro area level and also allow the situation in Ireland to be compared with that of other Member States.
